TECHNICAL PROFILE

MCA Candidate with a published IEEE research paper in Blockchain architecture. Specialized in Python backend development and decentralized applications (DApps). Proficient in smart contract deployment, cryptographic verification, and relational database management.

ACADEMIC DETAILS

Examination	Board/University	Institute	Year	CGPA / %
MCA (Pursuing)	Adamas University	Adamas University, Kolkata	2025–2027	–
Graduation (BCA)	Adamas University	Adamas University, Kolkata	2025	6.65
Class 12	CBSE	Central Model School, Barrackpore	2022	59.2%
Class 10	CBSE	Adamas World School, Barasat	2020	59.6%

FIELDS OF INTEREST

- Blockchain Technology and Smart Contracts
- Decentralized Applications (DApps) and Tokenization
- Python Programming and Backend Development
- Network Security and Web Technologies

TECHNICAL SKILLS

- **Languages:** Python
- **Blockchain Tools:** Solidity, Geth, Clef
- **Database:** MongoDB, MySQL
- **Core Concepts:** Database Management Systems (DBMS), Data Structures & Algorithms (DSA)

MAJOR PROJECT

- **Blockchain-Based Tokenization and Management of Land Documents:
A Decentralized Approach for Secure Ownership and Transfer**
(Sep 2024 – Apr 2025, under the guidance of Mr. Prabhat Das, Teaching Assistant, Department of CSE)
 - Engineered a decentralized web application (DApp) using Flask and Solidity to automate land asset tokenization, cutting out third-party verification latencies.
 - Integrated IPFS for immutable, decentralized document storage, leveraging cryptographic hashes to prevent tampering, backed by a MongoDB metadata cache.
 - Authored and tested secure smart contracts using OpenZeppelin standards, deploying local nodes via Geth and managing keys securely with Clef.
 - **Tools & Technologies:** Solidity, OpenZeppelin, Flask, MongoDB, IPFS, Remix IDE, Geth, Clef, HTML, Tailwind CSS, Python
